

Vagrant File:

```
config.vm.box =  
"elegoev/vagrant-centos-7.1-docker-compose"  
  
config.vm.provider "virtualbox" do |vb|  
  # Display the VirtualBox GUI when booting  
  the machine  
  vb.gui = true  
  #  
  # Customize the amount of memory on the  
  VM:  
  vb.memory = "2084"  
end
```

Vagrant Commands:

```
vagrant init elegoev/vagrant-centos-7.1-docker-compose
```

```
vagrant up
```
